DELTEC goes international – Expansion into an integrated corporate network

Furth im Wald, June 15, 2026 – **DELTEC continues to advance its strategic positioning and is evolving into an international corporate network. Effective June 15, 2026, owner Carsten Ellermeier has acquired Cicor Digital Tunisie S.U.A.R.L, headquartered in Borj-Cedria, Tunisia, with around one hundred employees.**

With the integration of the Tunisian site, DELTEC is purposefully expanding its range of services beyond traditional PCB assembly and taking the next step in building a high-performance, internationally positioned EMS network with end-to-end value creation.

The focus is on stronger vertical integration across the entire value chain:

- Cable assembly
- Plastic injection molding
- Module and product manufacturing

DELTEC is thus consistently transforming from an electronics manufacturer into a comprehensive system and solutions provider – in line with its guiding principle: “From Concept to Customer.”

The new international structure offers customers clear advantages:

- Greater supply reliability in an increasingly strained global supply chain environment
- Access to expanded manufacturing capacities within the network
- Improved scalability of projects – from small series to high-volume production

In addition, the integration opens up opportunities for new, cost-efficient project models. Especially for orders involving cost-intensive components such as cables, housings, or simple connectors, DELTEC will be able to operate much more flexibly in the future.

There are also clear benefits for the main site in Furth im Wald: electronics produced there can be complemented by components from Tunisia—efficiently, seamlessly, and from a single source.

The international competitive landscape places high demands on companies in the electronics industry—across the entire value chain from development to aftersales. This strategic expansion further strengthens DELTEC in this environment.

“Our customers are under significant pressure to remain internationally competitive—across all process steps. With this acquisition, we are even better positioned to support them reliably—from small series to industrial high-volume production,” explains Carsten Ellermeier, CEO and owner.

About DELTEC Group

DELTEC Group is an international partner for electronics manufacturing services (EMS) and system integration. The company supports customers across the entire value chain – from development and prototyping to serial production and beyond. At the core is a consistently digitalized manufacturing environment, enabling transparency, traceability, and efficiency in real time. By leveraging advanced technologies, integrated material management systems, and data-driven production processes, DELTEC ensures high quality and stable supply chains. With a strong global network and deep technological expertise, DELTEC helps companies build resilient, flexible, and future-ready production environments. Customer value, operational excellence, and a clear focus on sustainable value creation are at the center of its approach.
